

CUMMINS ALLISON JETSCAN® iFX NOW CERTIFIED ON VSOFT IMAGE PROCESSING PLATFORM

Cost-savings and efficiency gains benefit banks and credit unions

APRIL 10, 2014, MT. PROSPECT, IL and ATLANTA, GA— [Cummins Allison](#), the leading innovator and provider of coin, currency, check handling solutions and ATMs, and [VSoft Corporation](#), a global provider of information and technology solutions for financial institutions, announced today that the [JetScan® iFX](#) cash, check and document scanner is now certified on VSoft's Branch Capture solution. Financial institutions who use VSoft's solution can achieve tremendous savings and efficiencies using the fastest desktop check scanning product available: JetScan iFX.

Check-intensive operations can easily replace existing check scanners with a high-speed JetScan iFX to capture check and deposit item images at speeds twice as fast as previous check scanners. This unique two-in-one scanner can also be used to process currency 20% faster than any other solution. VSoft's Branch Capture application captures high volume deposits and facilitates correction and balancing at the branch. The solution can reduce the time spent managing transactions and instead get the transactions into the system more quickly and economically. This is also a welcome addition to RDC customers struggling with larger check volumes, as FIs add the JetScan iFX to their list of preferred check scanners.

One of the nation's top ten banks is using the JetScan iFX and VSoft's Branch Capture application to increase check processing efficiencies at their high volume branch locations. Due to the processing speed of the JetScan iFX scanner, branches are now able to process large volumes of checks that were previously held over or outsourced, realizing substantial savings. Bringing check capture back to high volume branches allows financial institutions to reduce outsourcing expenditures and realize improved profitability at branch locations.

Murthy Veeraghanta, chairman and CEO VSoft, states, "We're excited to work with Cummins Allison, one of the most trusted providers in the currency processing industry. VSoft is committed to our customers' success therefore bringing a new, faster check scanning solution to our customers makes sense. VSoft is pleased to certify this device and we believe it will help differentiate our offerings as well as help our customers achieve greater efficiencies."

"The JetScan iFX is a unique solution that images deposit items faster than any other solution on the market. At a true 400 documents and 1,600 bills per minute, this dual-purpose counter and scanner enables faster, more efficient back counter capture, allowing FIs to move one step closer to the goal of branch automation," said Frank Janezic, executive vice president, Cummins Allison. "By replacing slower check scanners with a compact device that also counts and images cash, users achieve process improvements, reductions in operating costs, and simplified training requirements. Beyond the financial benefits, these changes can result in higher employee morale and lower turnover."

The JetScan iFX [one](#)- and [two](#)-pocket scanners are both certified on VSoft's Branch Capture solution. They are the only devices of their kind and enable faster cash and check processing, streamlined remote deposit capture (RDC) and improved branch, vault, and merchant capture.
