### **VSoft Corporation Receives 2018 FinTech Breakthrough Award for Small Business Technology Excellence**

*Award highlights company's commitment to financial  
institutions and small business customers*

**ATLANTA, May 29, 2018** – [VSoft Corporation](#), a global provider of information and technology solutions for financial institutions, received the 2018 FinTech Breakthrough Award of Best Small Business Payments Solution for its OnView Business Deposit platform, a trailblazing remote deposit capture solution.

The annual FinTech Breakthrough Awards recognizes the top companies and products in the financial services and technology industry today. Founded in 2016, the FinTech Breakthrough Awards are evaluated by an independent panel of experts within the fintech industry, including media, analysts, journalists and technology executives. This year's program attracted more than 3,000 nominations from top fintech companies and startups all over the world.

VSoft's OnView Business Deposit changes the way that business owners interact with their bank or credit union by taking the convenience of a mobile remote deposit capture solution and applying it to their everyday needs. It enables business owners to reduce preparation time, overhead, operational costs and branch visits. With OnView Business Deposit, financial institutions of all sizes can attract a diverse range of business clients with different deposit habits. By reducing foot traffic in the branch for business deposits, tellers can focus their time and energy on other revenue-driving activities.

"OnView Business Deposit's innovative platform enables both business customers and their financial institution to save time and money, making it a true stand-out product for all parties involved," said Murthy Veeraghanta, chairman and CEO of VSoft Corporation. "At VSoft, we want to improve processes and create new efficiencies for our clients, and with our suite of OnView solutions, financial institutions can successfully deliver a range of payment capture options.
