VSoft Reveals New Enhancements within Product Suite at Annual Client Conference, VISION

Company presents new feature functionalities for its digital banking platform, core processing system and payments solution at VISION 2018

ATLANTA, May 23, 2018 – [VSoft Corporation](#), a global provider of information and technology solutions for financial institutions, announced several new enhancements to its product suite, including natural language processing for its digital banking platform, [Arya](#), and updates to [CoreSoft](#), the company's core processing system, and new feature functionality to the OnView payments products. VSoft showcased these new features at its annual client conference, VISION, held in Atlanta May 8-10.

VSoft showcased a natural language processing engine, which powers Arya's new live chat functionalities by consolidating input channels to enable a comprehensive cross-platform response set. This allows financial institutions to engage with account holders via multiple channels such as chatbots, SMS, Facebook Messenger or smart assistants. VSoft also redesigned CoreSoft to run using HTML and the latest Angular technology, further enhancing the overall functionality and flexibility of the system. Additionally, VSoft has expanded the archive and research capabilities of its OnView solution to retrieve processed ACH transactions. VSoft also announced that in the near future, OnView will support the retrieval of wire transfers and real-time payments.

For more than 20 years, VSoft has served the financial industry with its platform-based core, payment and digital banking solutions, cementing the company's reputation as a trusted service provider for banks and credit unions of all sizes. As the needs of financial institutions shift and consumer expectations evolve, VSoft has consistently adapted its solutions to deliver the utmost value for users, which has contributed to its significant growth over the years.

"VISION is our opportunity to highlight the latest feature functionality in the VSoft product suite and showcase what's next for our company," said Murthy Veeraghanta, chairman and CEO of VSoft. "We are thrilled to host our clients at this annual event, where we strive to provide a meaningful experience through insights from industry experts, networking opportunities and engaging sessions on best practices that ensure attendees have the necessary resources to solve any challenges they face, now and in the future."

About VSoft Corporation

VSoft Corporation offers platform-based services for the banking and financial services industry. Its core, payment and digital banking solutions reduce cost and maximize efficiency while providing seamless, real-time, high-volume and high-performance transactions across multiple channels. The VSoft platform can be delivered in-house, or as an outsourced ASP or SaaS model to best meet the needs of individual financial institutions. VSoft's services have been trusted by financial institutions worldwide. For more information, please call 770-225-7692, or visit www.vsoftcorp.com, or follow them on Twitter [@VSoft_Corp](https://twitter.com/VSoft_Corp).

About Arya

Arya, powered by VSoft Corporation, is an intelligent, open architecture digital services platform for both retail and commercial account holders that streamlines all channels under a single access point for a truly integrated banking experience. Account holders use one system for both business and consumer banking activities, with access to a variety of cash management services, all while logged into the same system. Unlike other platforms, check capture is native to the system to provide significant cost savings with no integration required. Arya uses standard real-time and file-based APIs to integrate into all core banking platforms. Built with the latest Angular technology, the platform provides a consistent user experience and is one of the most feature-rich and flexible systems on the market today with a low total cost of ownership.
