Branch Deposit

VSoft's OnView Branch Deposit increases efficiency for your staff by simplifying back-office operations. Disparate back-office systems can cause a negative ripple effect across your financial institution, absorbing time and labor that could be allocated to other impactful tasks. OnView Branch Deposit automates the validation and balancing of check deposits and payments, releasing your staff from manual entry in the back office. Your financial institutions can automate file transmissions to accommodate volume in peak business hours. The streamlined workflows help reduce posting errors and improve staff efficiency.

VSoft's device agnostic OnView Branch Deposit is web-based, meaning it can be easily accessed on any device with internet connectivity, providing your staff with more flexibility. OnView Branch Deposit allows you to adapt your business operations with changing technology and trends. The easy-to-use platform features an intuitive interface, so your staff can be up and running fast.

The platform was designed to be customizable, so you can structure it to fit your back-office operations and not the other way around. With OnView Branch Deposit, your financial institution can easily streamline operations while improving the experience of your staff.

FINANCIAL INSTITUTIONS CAN BENEFIT FROM:

Deposit and payment processing automation that reduces errors and branch workload

Reduced fraud with AFS real-time fraud detection

Simplified end-of-day settlement between branches and central processing

Faster posting and funds availability Reduced operational overhead, and central storage

Improved user experience on more devices

Customizable interface to suite your business operations

Secure single sign-on access

Built-in recognition that improves quality and balancing

Branch Deposit

MANAGE OPERATIONS EASILY WITH ONVIEW BRANCH DEPOSIT

OnView Branch Deposit streamlines your operations with powerful features that engage employees while simplifying their tasks, resulting in fewer errors and faster processing.

HIGHLY ACCESSIBLE

OnView Branch Deposit was designed with JavaScript-based Angular JS technology for a consistent, customizable, and intuitive interface that can be accessed using a smartphone, tablet, or computer. Staff members benefit from the option to complete tasks on more interactive and flexible devices.

COMPREHENSIVE VALIDATION

Comprehensive automation technology minimizes the exceptions staff members receive. CAR/LAR, image quality and usability assurance, automatic re-orientation, and our Intelligent Repair Image System (IRIS) verifies and repairs the image

FRAUD DETECTION

VSoft's OnView Branch Deposit integrates with AFS True Checks to provide real-time fraud detection for your financial institution.

BUSINESS RULES

Flexible business rules allow you to tailor every part of your payment processing, from the number of branches to the types of transaction documents you capture or the fields you validate.

AUDIT TRAIL

The advanced audit trail captures over 150 metadata elements and includes them in the long-term archive for in-depth research and reporting.

DUPLICATE DETECTION

VSoft's real-time, in-application duplicate detection leverages the integrated archive to identify duplicates before the check is sent for back office processing. The staff member receives instant feedback, allowing them to address the issue immediately.

ROLE MANAGEMENT

Manage user roles simply through the comprehensive administrator profile to maintain the security of your branch operations and image archive. Our platform takes the complexity out of restricting and establishing access by role, user, account range, and more.

AUTOMATED WORKFLOWS

Fully automated image and data workflows help your staff save time and improve operational efficiencies in the branch. Automation improves the speed that most transactions are handled and processed.

BALANCING

In-application balancing helps streamline processing. Institutions can balance multiple transaction types and have the option to balance in a variety of ways that best fits with their business operations.
