Business Deposit

The small business sector is growing rapidly, which presents an opportunity for you to deliver a unique solution to a flourishing untapped market.

OnView Business Deposit gives businesses a way to transmit checks using a smartphone, tablet, or desktop scanner, effectively lowering operational costs for both you and your business account holders. With our five device licensing model, business owners can mix and match devices to coordinate with the various roles of their employees. Business owners decide the best option for their operations, whether it's using the application exclusively on smartphones, or using a combination of all three devices. Furthermore, financial institutions can expand their market base to encompass small businesses. OnView Business Deposit is attractive to small business owners because their employees can use devices they already have instead of investing in costly scanners.

OnView Business Deposit is easy and convenient for account holders, while providing a comprehensive solution for financial institutions. The role-based user management feature ensures you can set a separation of duties among your staff for efficient processing. On the back-end, all capture channels are funneled into a web-based platform to streamline back-office processes.

FINANCIAL INSTITUTIONS CAN BENEFIT FROM:

Scalable platform that supports growing businesses and your financial institution's operations

An expanded market base

Automation that seamlessly captures, validates, corrects, balances (optional), and transmits deposits into the integrated archive

Consistent back office and research process for all checks, regardless of capture entry point

Consolidation of channel data into one remote deposit capture platform

Less in-branch foot traffic to reduce operating costs

Rich data that can be easily analyzed to make informed decisions

HELP LOCAL BUSINESSES THRIVE WITH ONVIEW BUSINESS DEPOSIT

The platform's feature-rich tools help business owners quickly transmit checks, securely store images, and more. By offering this intuitive application to business account holders, your institution can create a new source of revenue and gain increased operational efficiency.

RESPONSIVE DESIGN

The responsive design feature allows the OnView Business Deposit platform to adapt to varying operating systems and screens, allowing business owners to designate more flexible and interactive devices to certain employee activities.

INSTANT CHECK VALIDATION AND FEEDBACK

Image quality automation technology is applied the moment a user transmits a check. CAR/LAR, image quality and usability assurance, automatic re-orientation, and our Intelligent Repair Image System (IRIS) verifies and repairs the image so business account holders receive feedback and validation instantly.

MULTI-CHECK MOBILE DEPOSIT

Business account holders can capture multiple checks in a single deposit to transmit quickly and minimize the keying required.

INTUITIVE WORKFLOW

The fully automated image workflow seamlessly captures, validates, corrects, balances (optional), and transmits deposits into the integrated archive.

CONFIGURABLE THRESHOLDS

This smart feature allows you to protect your financial institution from fraud while providing flexible limits to business account holders. Set a low dollar limit to review deposits, and set a high dollar limit to reject deposits.

USER MANAGEMENT

Assigning user roles and restrictions is easy in the OnView Business Deposit platform, which allows your financial institution and business account holders to efficiently run operations, secure information, and reduce bandwidth.

DUPLICATE DETECTION

Our in-application, real-time duplicate detection works with the integrated archive to catch duplicates before the check enters your system. The depositor receives instant feedback, allowing them to correct the error up front.

MULTI-LOCATION

With the application's customizable multi-location feature, business owners can identify where an employee is transmitting a check from. Additionally, users can indicate which account they would like to deposit.
