## Core Processing

CoreSoft is a comprehensive core processing system built on advanced technologies. Its independent platform and open-system design enables your financial institution to adapt quickly to industry changes and scale operations. CoreSoft gives you the freedom to choose the hardware and software infrastructure that will give your institution a competitive advantage in this ever-changing technology landscape. Our flexible core system offers remarkable control in terms of deployment options, operating environments, and processing methods.

CoreSoft helps you make data-driven decisions by providing a unified view of account holder information through synchronizing fragmented systems. Selecting the delivery model of your choice, based on your size, required features and budget, results in optimizing your resources so you never lose sight of your main goal. Your institution can adapt either real-time or batch posting, or a combination of these transaction processing methods in an operating environment of your choice. With customizable business rules you gain remarkable business agility to quickly launch new products or fine tune your existing products.

The true value of CoreSoft is the superior benefit-cost ratio it offers with higher return on investment for lower total cost of ownership. The modular structure of the system and SOA-enabled, reusable business services combined with multiple delivery models and hardware independence gives you comprehensive flexibility in terms of ownership costs. Additionally, CoreSoft modernizes your business process to improve information access across multiple systems and services across your financial institution. Compatibility with popular hardware and multiple deployment options helps you keep the ownership cost low, giving you true value for your technology investment.

### FINANCIAL INSTITUTIONS CAN BENEFIT FROM:

- Flexible software infrastructure for quick and easy integration
- Freedom of choice in deployment, operating environments, and processing methods
- Lower total cost of ownership
- Streamlined information flow
- Make business changes quickly with customizable parameters
- Elimination of legacy code
- Efficient end-to-end transaction processing
- Support for multi-tenant, multi-calendar, and multi-timezone

## CORESOFTE COMPREHENSIVE MODULES STREAMLINES OPERATIONS

CoreSoft includes a suite of robust modules, including the Administration Portal, Customer Information System, Collections, Deposits, Exceptions Item Processing, General Ledger, Loans, Report Writer, and Security System. All of the feature-rich modules were carefully designed with next-generation technology to make customization easy.

### **SERVICE ORIENTED ARCHITECTURE**

The platform independent and open-system design leverages your existing technology infrastructure, lowering development and maintenance costs.

### **DATABASE & HARDWARE AGNOSTIC**

CoreSoft is compatible with a wide range of hardware, operating systems, and databases. VSoft is committed to certifying technology to maintain your freedom of choice.

### **COMPREHENSIVE WORKFLOW**

Our user interface ensures more effective operations due to process workflow efficiencies.

### **FLEXIBLE PARAMETERS**

Configure new products and roll out quickly within a matter of minutes with CoreSoft's flexible parameters. New screens, sections, and fields can be added in real time natively in the system without having to depend on costly programming

### **COMPLETE REPORTING**

Customize reports easily and export in a variety of formats, such as PDF, Word, and excel. Automate monthly reporting with scheduled report generation.

### **HIGHLY ACCESSIBLE**

CoreSoft is web-based, meaning it can be accessed using a smartphone, tablet, or computer. Staff members benefit from the option to complete tasks on more interactive and flexible device

### **CUSTOMIZABLE PRODUCT FIELDS**

Set-up additional product specific fields and define the data type, valid values, default value, and multiplicity of the field. The flexible interface allows you to attribute the field to any screen, allowing you to customize the platform to fit your operations.

### **INTERFACES/INTEGRATIONS**

CoreSoft enables institutions to keep up with the speed of innovation by integrating to various industry solutions. CoreSoft's architecture is designed to add new products and services quickly without disrupting the user experience.
